

COUGAR

Setting the standard in underground equipment manufacturing and services.

Lifecycle solutions for underground mining performance.

A relentless commitment to innovation, manufacturing & the highest standard of service.

We are an OEM of underground technology with a comprehensive product line built from our in-house intellectual property & mining expertise.

Our manufacturing solutions include personnel transporters, graders, longwall relocation equipment, drill rigs and auxiliary power equipment.

We offer underground in-seam gas drainage services, a complete portfolio of equipment available for hire and a first-class overhauls team.

Where mining expertise and engineering capability meet to deliver practical solutions to the industry’s toughest challenges.

Cougar has the tenacity and determination to be the best; it’s in our DNA. More than just a job, we live it. We’re down to earth, we care, and we’re all in it for the same reason; to support our staff, their families and the communities where we do business.

At Cougar, our culture is the foundation of everything we do. It drives accountability at every level, underpins disciplined decision making, and fosters a genuine care for our people.

This shared mindset ensures we deliver on our commitments, maintain the highest standards, and create a workplace where safety, respect, and performance go hand in hand.

Our values

-  Find a better way to do it.
-  Speak with honesty & respect.
-  Be safe always.
-  Own it.
-  Work as a team.

End-to-end equipment and service solutions, built for performance.

We manufacture, hire, overhaul and operate industrial equipment, and employ over 400 people in New South Wales and Queensland. 25+ years of determination power every machine we build, hire, overhaul, and every metre we drill underground.

Cougar supports underground operations throughout Australia's leading mining basins, delivering solutions where performance matters the most.

We proudly develop and deliver solutions to the toughest challenges in underground mining.

Purpose-built finance solutions for the underground mining industry.

Cougar Capital is a unique offering designed specifically for underground coal operations. It gives you access to newly built Cougar machines without the need for large upfront capital outlays or external finance approvals.

With flexible term lengths and payment options, it's ideal for customers managing OPEX budgets or seeking an alternative to traditional funding models.

We build world-class mining products designed to perform in the toughest environments and conditions.

Cougar products are designed, engineered, and built in Australia to meet the demands of underground mining. From drilling accessories to complete machines and mine services pipe, we deliver high-performance solutions that keep operations safe, reliable, and productive.

In the field and the workshop, we support your equipment through its entire lifecycle.

Providing end-to-end support, Cougar's accredited workshops deliver everything from routine maintenance through to major overhauls. Our team is qualified across all codes for underground mining equipment, ensuring every machine we service is compliant, reliable, and ready for the toughest conditions.

Repairs and Overhauls

Cougar provides specialised underground equipment support, repairs and overhauls to help mining operations keep their assets performing at peak capacity. Our team works to maximise the life and reliability of every machine, ensuring equipment reaches its full lifecycle potential and continues to operate safely and efficiently in demanding underground conditions.

Field Service

When your operation needs support on site, Cougar's field service team is ready. Covering the east coast of Australia, our experienced technicians provide product support, maintenance, and repairs when your machine can't make it to our workshops.

Parts Network

Cougar's high velocity parts system moves over a thousand components in and out every week to keep mining operations running without delay. We supply the same genuine OEM parts that go into our machines, ensuring quality and compatibility.

Maintenance

Expert maintenance across powertrain, hydraulics, and electrical systems, handled by factory-trained technicians.

Predator Overhaul Package

Our Predator overhaul package gives a second life to customer assets by injecting Cougar IP to provide improved acceleration, reduced emissions and a superior performing machine.

Electrical Overhaul Services

Accredited AS3800 underground coal electrical overhauls workshop capable of handling minor to major overhauls from individual components to entire machines.

Underground hire solutions built for performance and reliability

Cougar's underground hire fleet covers everything from run of mine equipment through to longwall relocation and specialist maintenance machines. Backed by accredited workshops and expert service teams, Cougar provides the flexibility to scale operations without the cost of ownership.

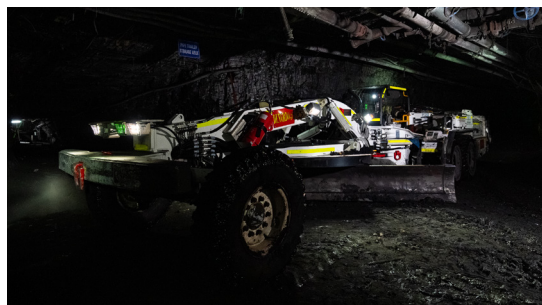

Run of mine equipment fleet

Cougar offers a full suite of the latest underground equipment for hire, including LHDs, personnel carriers, and run of mine support machines. Designed for reliability and performance in demanding conditions, our hire fleet provides the flexibility to scale your operations without the capital outlay of ownership.

Longwall relocation fleet

Cougar's longwall relocation fleet is the most comprehensive and advanced range of heavy lift equipment in the underground mining industry. Supported by expert service teams, Cougar keeps your longwall operations on schedule.

Maintenance fleet

Cougar's maintenance hire fleet includes the latest underground graders and Flitmate mobile gensets, purpose-built to support critical mine maintenance operations. Designed for reliability and performance in harsh underground environments, these machines help reduce downtime and keep your site running efficiently.

Specialised drilling solutions for Australia’s underground coal industry.

Since 2016, Cougar Drilling has grown to become a trusted provider of underground in-seam (UIS) gas drainage services. With over 200 skilled operators and a fleet of 24 drill rigs operating across Australia, we deliver the scale and expertise needed for complex underground environments.

Operations

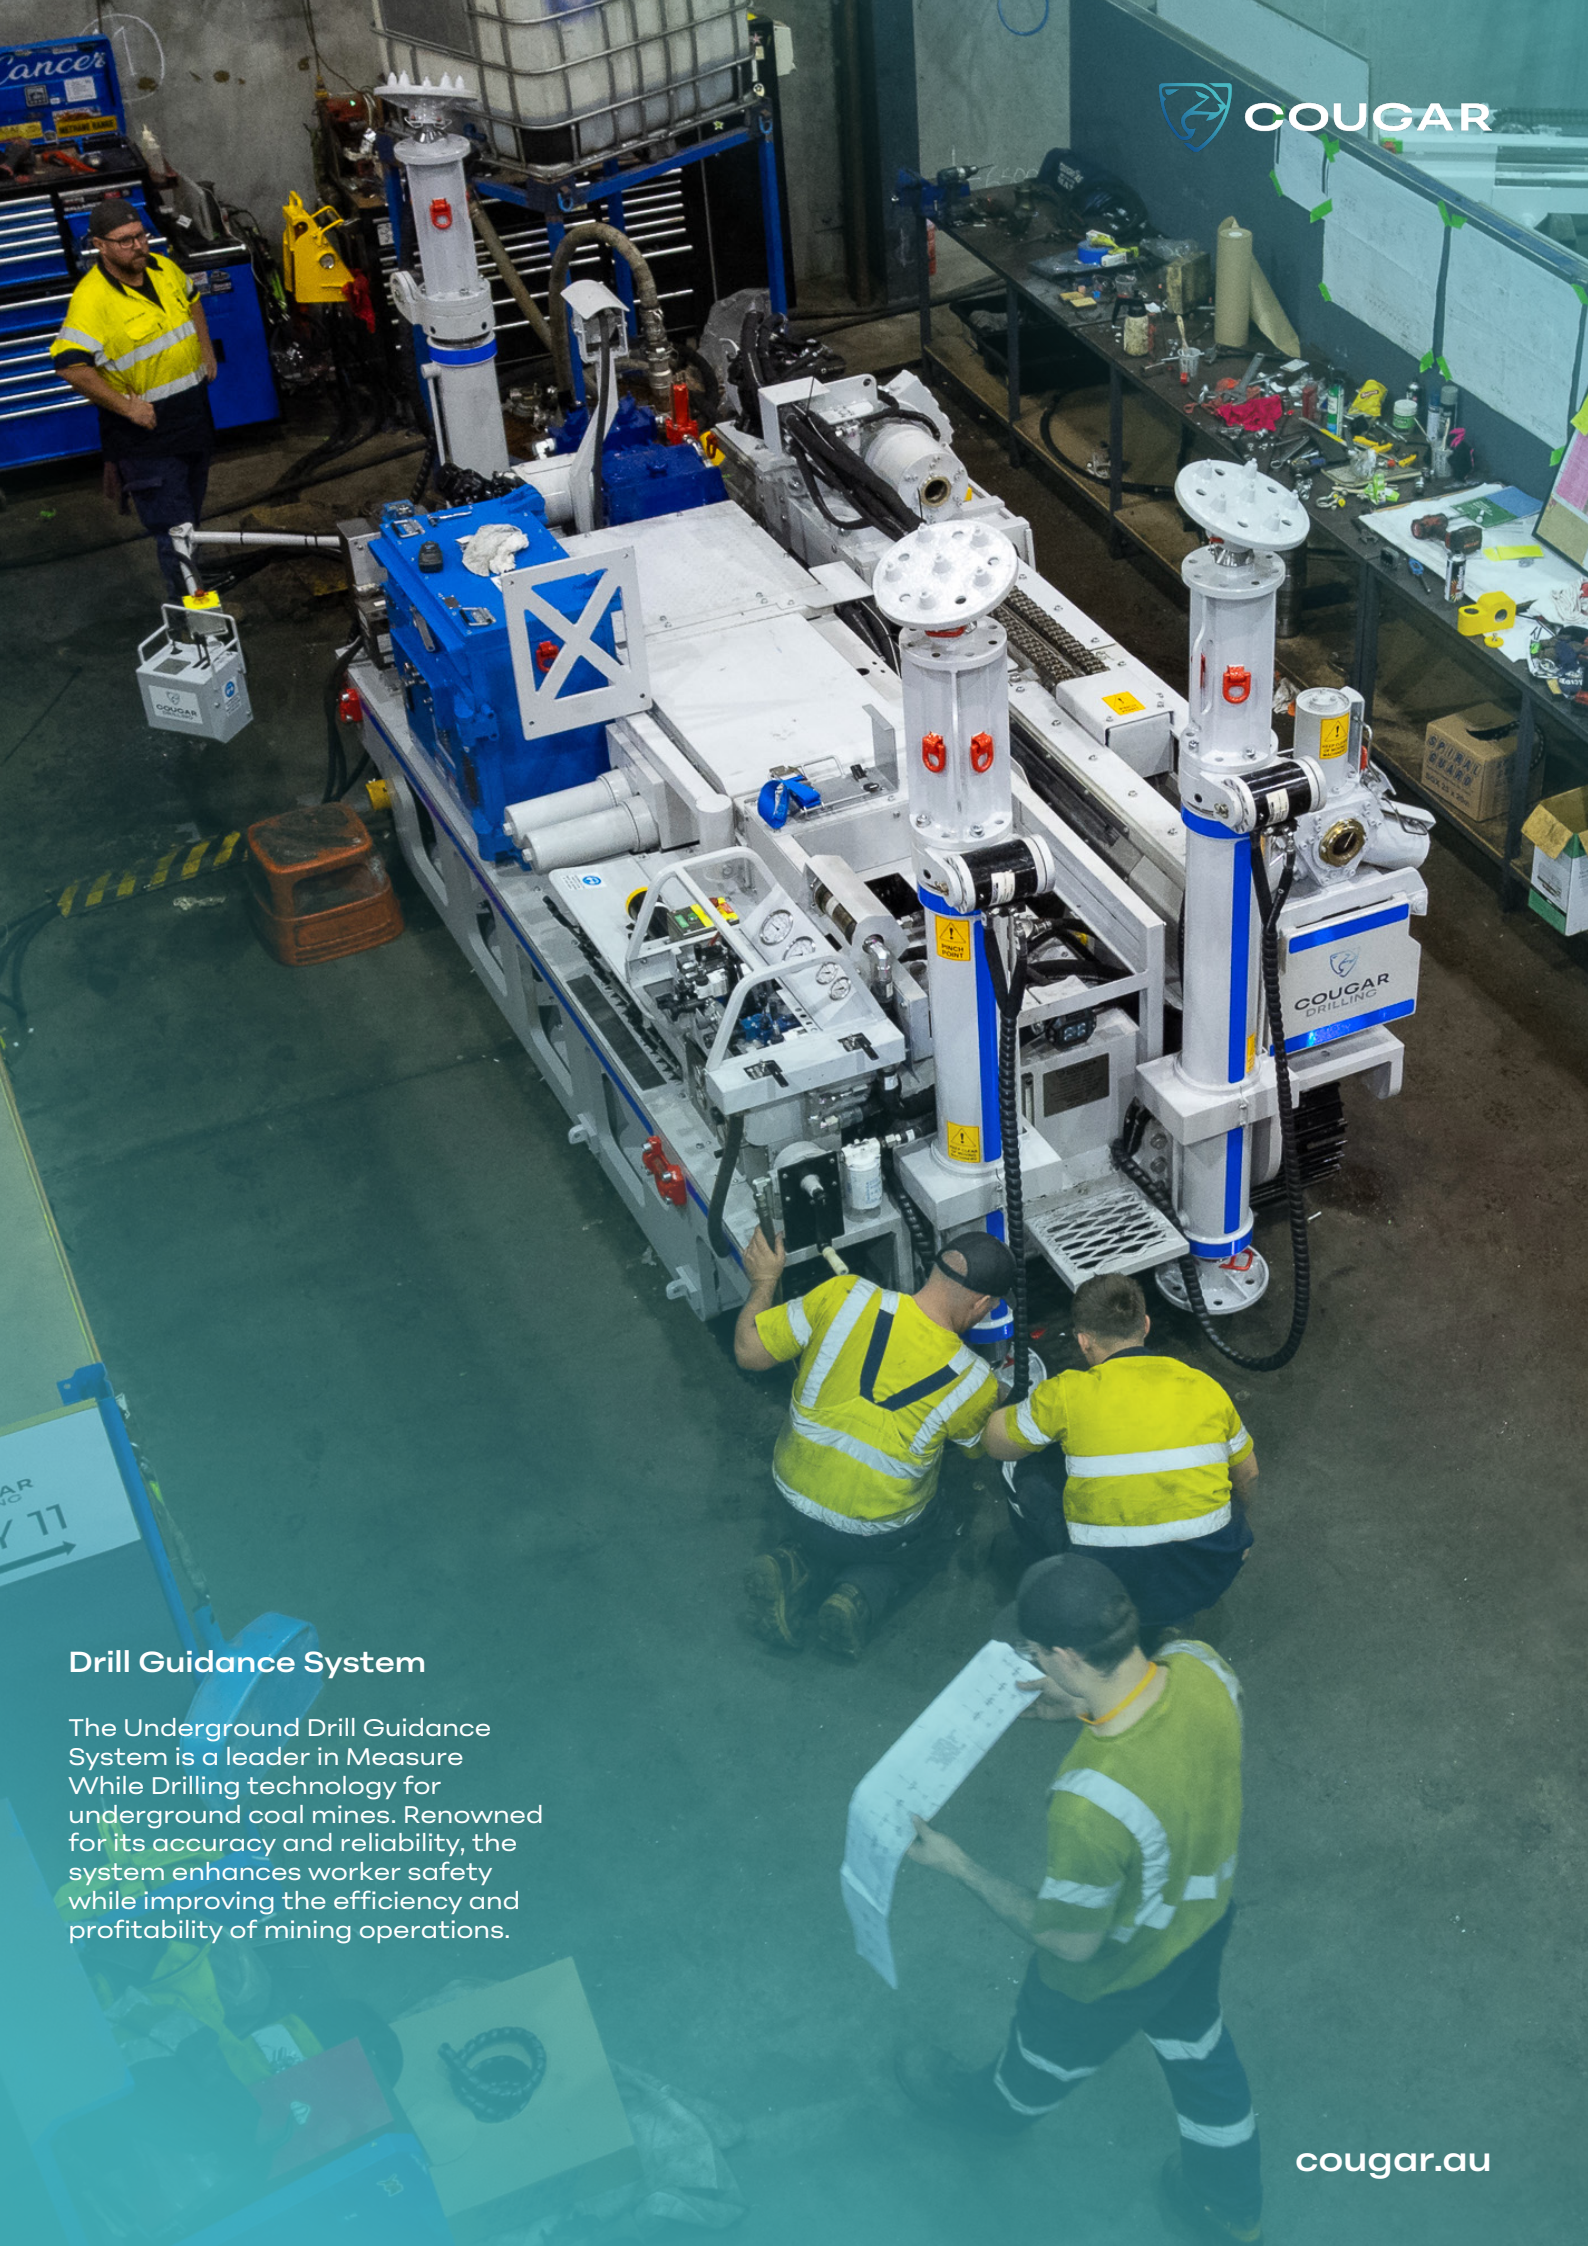

Long-term contracts across NSW and Queensland have positioned Cougar Drilling as a trusted provider in Australia’s coal industry.

Maintenance

Our state-of-the-art workshops deliver comprehensive overhaul services for customer-owned drill rigs, ensuring peak performance and extended equipment life.

Accessories

Cougar’s range of drilling accessories is engineered for durability, efficiency, and compatibility with demanding underground conditions.

Drill Guidance System

The Underground Drill Guidance System is a leader in Measure While Drilling technology for underground coal mines. Renowned for its accuracy and reliability, the system enhances worker safety while improving the efficiency and profitability of mining operations.

Protecting people and supporting safe, efficient mining is at the core of everything we do.

Safety is more than compliance at Cougar. It's a mindset that starts on day one and carries through every operation. Our teams are trained to the highest standards, and we invest in systems and processes that reduce risk and protect people underground and on site.

PAWS

At Cougar, it is our belief that the health and safety of all personnel at our workplace is paramount. Safety isn't just a priority; it's a core value. Cougar's PAWS approach instills the importance for every team member to **PLAN AND WORK SAFE**, every task, every time.

ISO and NATA accreditations back our commitment to a high standard of quality.

Powered by our people

At Cougar, safety starts with our people. Every team member is empowered to take ownership of safety and supported through training, mentoring, and systems that reinforce safe work practices. By investing in our people, we create safer outcomes for our customers and communities.

Cougar's culture prioritises care for each other, accountability, and discipline in every action. Safety isn't an afterthought – it's embedded in the way we work, make decisions, and deliver for our customers. This culture ensures we stay vigilant and proactive across all operations.

Corporate governance

At Cougar, governance starts with accountability. Every decision is guided by integrity and responsibility, supported by systems that ensure transparency, compliance, and ethical business practices. By embedding strong governance across our operations, we create confidence for our customers, partners, and communities.

Cougar's culture prioritises discipline, responsibility, and fairness in every action. Governance isn't an afterthought, it's built into the way we operate, manage risk, and deliver value. This culture ensures we remain consistent, ethical, and reliable across all aspects of our business.

“We are committed to the highest safety standards, ensuring every project is delivered with care, compliance, and confidence.”

Backing communities, building healthy futures.

Cougar is committed to sustainability and community support. We invest in responsible practices that minimise environmental impact, while backing the communities where we operate through sponsorships, partnerships, and local initiatives. Every project we deliver carries a responsibility to people, place, and future generations.

At Cougar, sustainability shapes the way we design, build, and support equipment. It drives investment in battery technology, overhaul programs, and service exchange initiatives that extend asset life and reduce waste.

This commitment ensures we help customers meet operational demands while lowering environmental impact, supporting a cleaner, more efficient future for underground mining.
